HAVENSPRING · CASE STUDY

Zero-LTI Program Across a 1,200-Person Offshore Fleet

Client: Confidential Offshore Operator **Sector:** Oil & Gas — Deepwater Nigeria

Challenge

Following two high-potential incidents in a single quarter, the operator faced regulatory scrutiny from NUPRC and pressure from JV partners to demonstrate a credible turnaround in process-safety performance across three floating production units.

Havenspring Approach

- Executed HAZOP and Bowtie analyses on 14 critical safety systems
- Rebuilt the Permit-to-Work regime under ISO 45001:2018 controls
- Deployed the Havenspring ERP Safety Module across all three FPUs
- Delivered NEBOSH IOGC certification to 187 supervisors and OIMs
- Established a live compliance dashboard with executive KPI reporting

Measured Outcomes

Metric	Result
Lost-Time Injuries (12 months)	**0**
Reduction in reportable incidents	**74%**
PTW cycle time	**-58%**
ISO 45001 certification	**Achieved, 0 major NCRs**
Estimated insurance premium saving	**US $2.1M / yr**
